Dolphin™

Neurostim OTC

All Natural, Drug-Free Pain Relief

Health Science & Electronic Technology Working Together

Dolphin Neurostim™ OTC (DNS OTC) is a hand-held micro current Transcutaneous Electrical Nerve Stimulator (TENS) device, specifically designed for the temporary relief of muscular pain.

The DNS OTC is engineered to detect and stimulate areas of low impedance. This unique approach for the temporary relief of pain associated with sore and aching muscles in the back, arms, and legs due to strain from exercise or normal household and work activities has been developed with input from healthcare professionals and has been thoroughly tested for over 30 years.

Q&A

Is the Dolphin Neurostim™ OTC difficult to use?

We think you'll find that both our self-help unit and our systematic approach to pain management are extremely user-friendly.

Is the Dolphin Neurostim™ OTC safe to use?

The Dolphin Neurostim™ OTC is battery-operated and very safe. *Please Note: Patients who are pregnant, epileptic or fitted with cardiac pace makers, should NOT use the Dolphin Neurostim™ OTC.*

How long does the Dolphin Neurostim™ OTC take to work, and how long does the pain relief last?

In many cases, it can provide instant symptomatic pain relief within minutes of the first treatment. Chronic conditions may require daily treatment for 1-2 weeks before significant progress is noted. Pain relief can last anywhere from just a few hours to a few days. The average response is 24-72 hours, with results building with each successive treatment.

What does the medical profession say about the Dolphin Neurostim™?

Practitioners all over the world are discovering the benefits of the Dolphin Neurostim™ OTC's pain relieving abilities. Our unit is helping thousands of patients in hospitals, chiropractic, massage, and physiotherapy clinics.

Will my insurance company pay for the Dolphin Neurostim™ OTC?

Most private health plans, Worker's Compensation, and the DVA will cover TENS devices. In most cases, all that is needed is a Medical Doctor's recommendation.
